

Geography strands across the school:

Geography at Kennington has been split into three different strands. These strands are physical geography, human geography and location and place. Each year group has different units of work that cover these strands (some units of work may cover more than one strand).

Physical geography:

Year 3 – Climate zones

Year 4 – Rivers; Rainforests; South America

Year 5 – Mountains; Volcanoes and earthquakes

Year 6 – UK; Local area study; Comparison of countries in different continents

Human geography:

Year 3 – Climate zones

Year 4 – Rivers; Rainforests

Year 5 – Europe; Mountains; Volcanoes and earthquakes

Year 6 – UK; Local area study; Comparison of countries in different continents

Location and Place:

Year 3 – North America; Brazil

Year 4 – South America

Year 5 – Europe

Year 6 – UK; Local area study; Comparison of countries in different continents
